

Kanatek Data Recovery Solutions

Kanatek's extensive experience in deploying Backup & Recovery systems provides us with the expertise to design, architect, implement and manage solutions to ensure that data is protected, archived and always available. Our Data Recovery Solution provides services to help you when data loss has occurred.

Mitigate the Risk of Data Loss or Disruption

An effective Backup & Recovery solution quickly restores file and application data in the event of system failure, data corruption or accidental deletion. This can be a mission-critical issue for organizations. Analysis of the amount of downtime your organization can handle must be done in order to determine your DR planning approach. Kanatek uses industry best practices to eliminate data loss or system disruptions during upgrades or implementation of Backup & Recovery systems.

Kanatek will help you:

- Create, document and test a disaster recovery plan that is in line with your organization's current high-level strategies.
- Quantify the cost of down-time to your organization and the cost of mitigating it.
- Perform data recovery in the event of a disaster

Each Data Recovery Solution will be unique, based on your environment. Speak with our Solution Architects to plan the most expedient recovery of your data.
